

AGCULATE IS LOOKING FOR ML ENGINEER

Agcurate is a leading Dutch - Turkish startup, providing satellite imagery driven crop assurance products. We are looking for a Machine Learning Engineer, based in Ankara, to work on exciting international R&D projects.

YOU MUST HAVE

- 3+ years of machine learning experience
- Experience of machine learning in computer vision domain
- Good command of Python
- Experience with at least one DL framework (Pytorch, Tensorflow, Keras etc.)

WE'D PREFER IF YOU HAVE

- MSc in a relevant field
- Experience in satellite imagery
- Experience with deep learning models for image analysis

YOUR ROLES AND RESPONSIBILITIES WILL BE

- Satellite image processing
- Research and development on crop monitoring/analytics
- Preparation and use of datasets of satellite imagery and secondary data
- Development of ML based solutions for remote sensing problems
- Testing, validation, and benchmarking

WE OFFER

- Competitive salary, protected against financial volatility
- Opportunities for personal and professional growth
- Supportive and friendly team environment
