Do you want to be a part of a dynamic and creative team?

Maybe your expectation is to develop yourself in several software languages? Well, maybe to create and develop a game without boundaries? How does it sound? If you have passionate answers to these questions, come and push the limits with us!

Because our vision is to connect people through games that encourage meaningful social interactions - what we feel is the key ingredient of fun. We value quality, innovation, creativity and community above all else. We are among the top 3 gaming company established in Turkey.

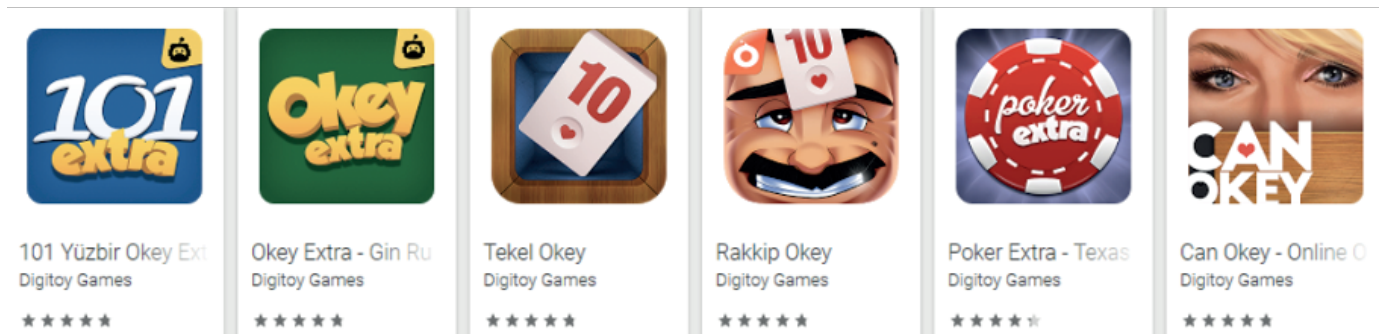

At Digitoy Games, our goal is to create dynamic, engaging, innovative games that connect people and ideas in new and exciting ways. We believe in talent and vision's perfect match.

Our team has worked in the social networking arena since social networking was born, and we use our combined experience and innovation to create compelling social games. We pride ourselves on thinking outside the box, committing ourselves fully to the task at hand, and responding to the feedback of our thousands of daily players.

And we are located in İYTE - İzmir, Turkey.

Our Offer

Junior Software Developer Back End & Front End

At Digitoy Games, our goal is to create dynamic, engaging, innovative games that connect people and ideas in new and exciting ways. We are located in IYTE İzmir, Turkey.

If a game is not just a "Game" for you, if you like to push the limits of the technology and you think that doing the right thing sometimes does not care about the rules and the majority does not think it, Digitoy Games is pleased to meet you!

We are looking for Junior Software Developers (Back End or Front End Development) to come join our dynamic team!

It doesn't matter which technology you prefer to code, our main goal is to develop YOUR future. If you are a gaming enthusiast with a taste for development, then we would like to welcome you at Digitoy Games.

If you are:

- A senior or a newly-graduate in Computer Engineering or Software Engineering
- Interested in the game industry
- Following new technologies
- Excited about improving your "coding game"

Then you are who we are looking for!

Like what you hear? Apply Now!
