

Seminars in Biotechnology BTEC 592 & BTEC 692

“Bioanalytics of Life: Analysis of Biomolecules”

Thursday, May 18, 2023

13.30

Biotechnology Lecture Hall

Engin BAYRAM, PhD

Field Support Specialist, Reotek Cihazlar Ltd

Graduated from Hacettepe University, Dept. Of Chemistry at 2003, then received MSc degree in Analytical Chemistry at 2007, and PhD. degree in Biochemistry from the same university at 2013. Scientific area of interest is, preparation of polymer based affinity sorbents and their applications in biochemistry (clinical diagnostics), food control analyses(QC), environmental technologies (waste water administration) and chromatography related detection techniques such as mass spectrometry.

Worked on the development of clinical diagnostic kits for HPLC in a medical company, covering the period of 2004-2007. Between 2007-2019, worked as a Mass Spectrometry application specialist and assistant manager in MBU (Mass Spectrometry Business Unit) for Ant Teknik Cihazlar Ltd, local distributor of Shimadzu Corporation in Turkey. By the start of 2020, joined to IMBIYOTAB (Boğaziçi University Istanbul Microalgae Biotechnologies R&D Unit) as Post-Doc, and at the same time assigned as “Project Expert” in “Project INDEPENDENT”, an EU granted IPA Project. Still workin at Reotek Cihazlar Ltd. as Project consultant and field support specialist.
