

Dear Students and Faculty Members,

The third graduation project day event (2024-MBG Graduation Project Day-3) will be held on **Friday, May 24, 2023**, on the ground floor of our department and in the amphitheater hall. The purpose of this event is not to race the projects, but to provide an environment where our graduating students can express themselves and experience mutual interaction in scientific environments. **Each student taking the Graduation Project II course is required to prepare a poster about their project, and those who will be selected for the presentation must prepare a formal presentation that will not exceed 10 minutes, including presentation and question-answers in addition to the poster presentation.** These selections will be made according to scientific criteria based on sampling from each area.

You can send your questions to mbg_bitirmeproje@gtu.edu.tr.

Workflow:

First, each of our students will need to create summaries of their projects using the attached draft and have them approved by their advisors, and then send them to the upload area via the link that will be announced on **May 10, 2024**, with the file name 'student-name_surname__advisor-name_surname' before **May 14, 2024 (23:59)**. The 5-10 students, who will be selected for presentation talk needs to the PPT draft in the attachment, will be informed on **May 17, 2024** (before noon). The program is planned to take place between 9.00-15.00.
